

KY Alcohol Delivery Decal Instructions

To comply with Kentucky state regulations (Title 804, Chapter 8, Regulation 050; KRS § 243.020), **all vehicles transporting alcohol must display identification.** The law requires decals to be affixed to **both** sides of your vehicle. Proof of decal installation must be provided to be certified to claim and deliver orders containing alcohol on the Shipt platform. Below are instructions on how to apply the decals:

1. Select

an application an area that will not obstruct your view of the road.

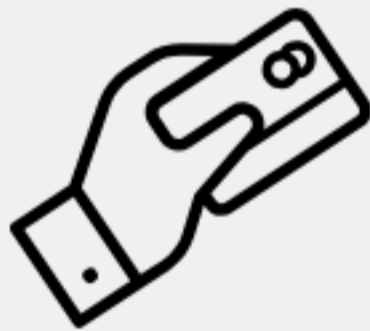

2. Clean

surfaces to remove any dust or grime using rubbing alcohol or all-purpose cleaner.

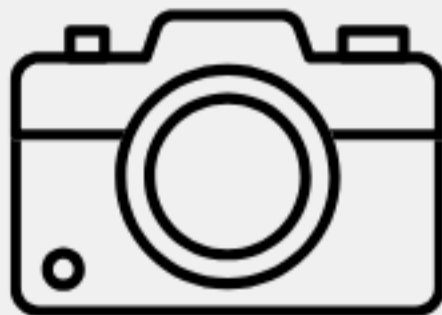

3. Place

text-side of the decals to the glass. Ensure full decal is visible and design is facing out.

4. Smooth

out any air bubbles using a credit card or flat edge.

5. Photograph

an image of the decals applied to your vehicle and submit it to alcoholdelivery@shipt.com

For best results, apply at a temperature of around 50°F or warmer. If the cling does not stay in place during initial application, it may be due to cold conditions. Allowing the window to warm up slightly should help it stay put!
